

**MEMORANDUM**

**TO:** STAR PCPs

**FROM:** El Paso Health

**DATE:** 04/18/2023

**RE:** Maternal Depression Screenings and Case Management

Maternal Depression is a serious widespread condition that not only affects the mother, but may have a lasting detrimental impact on the child’s health.

These screenings are a covered benefit and are performed by either a Pediatrician or OB/GYNs provider. It is essential we work together to assist these mothers in need of specialty care.

If you identify a positive screening our Case Management Team is able to assist you in your practice to provide quality care.

Fill out our **Case Management Referral Form** located on our website under provider/forms under Health Services. Forms may be faxed to our Case Management fax line at 915-298-7866.

Maternal depression presents a significant risk to proper child development, the mother-infant bonding, and the family. Let’s work together to help our mothers and babies thrive!

If you have any questions regarding this communication please contact our Provider Relations team at 915-532-3778 or email us at [ProviderRelationsDG@elpasohealth.com](mailto:ProviderRelationsDG@elpasohealth.com) .
