Tuberculosis Screening: TB Questionnaire must be administered annually	~	~ ~	~	~	~	^	~	~	~	~
beginning at 12 months of age. A Tuberculin Skin Test is to be										
administered when the screening tool indicates a risk for possible exposure										
		x	x	x	x	x	x	x	x	x
Developmental Surveillance/Screening										
- Providers must use one of the following validated, standardized tools										
when performing developmental screening:										
•Ages and Stages Questionnaire (ASQ)										
•Ages and Stages Questionnaire: Social Emotional (ASQ:SE)										
•Parents' Evaluation of Developmental Status (PEDS)										
http://agesandstages.com/										
		X	X							
- Developmental surveillance is required at all other checkups and										
includes a review of milestones and mental health, including: gross and										
fine motor skills, communication skills, speech-language development, self-										
help/care skills and social, emotional, and cognitive development.										
	х		-	X	X	-	-	-		
Nutrition Screening: Dietary practices should be assessed to identify										
unusual eating habits such as pica, extended use of baby bottle feedings,										
or eating disorders in older children and adolescents. For nutritional										
problems, further assessment is indicated.	х	x	x	x	x	х	x	x	x	x
Ann Annuarista Conceria 8 Administration of Inconvisations. Descident										
Age Appropriate Screening & Administration of Immunizations: Providers										
must assess the immunization status of clients at every medical checkup										
and vaccines must be administered according to the current Advisory Committee on Immunization Practices (ACIP). "Recommended Childhood										
and Adolescent Immunization Schedule. The ACIP schedule can be found at										
http://www.cdc.gov/vaccines/schedules/index.html.	v	v	v	×	v	v	v	v	×	v
